## International Nurses Day 2019

We celebrated International Nurses Day on 12 May by highlighting the contribution of nurses on social media.

Did you know that only 11.4% of registered nurses in the UK are men, and only 2.1% of men work in general practice? It would be good to see more male general practice nurses in the healthcare sphere to help combat the current nursing crisis. #IND2019 #GeneralPractice #malenurse

Couldn't agree more! "Nursing is not about whether we wear dresses, tunics or scrubs, not whether we wear white, blue or navy; it's about delivering the best care for our patients and their families"

— Londonwide LMCs (@LondonwideLMCs) May 7, 2019

Fun fact: 1/4 of nurses working in general practice have more than 1 job. This brings a broad range of knowledge and skills to general practice. #InternationalNursesDay #GeneralPractice

Happy #InternationalNursesDay2019. All of our LMCs have space for a nurse member. Check out @WessexLMCs article discussing the impact a nursing role has on aiding the representation of all clinicians within primary care.
