## Updated coronavirus guidance for practices

NHS England and Improvement updated guidance to practices on 18 February 2020.

The briefing for primary care providers can be viewed [here](#).

This includes:

Advice to the public, including posters, what to add to your website/phone system and template communications in the event a practice needs to be closed for decontamination.

Actions practices need to take if a suspected case of Covid-19 is identified, including if the person attends the practice.

The responsibilities of NHS 111 and the process it should be following.

What clinicians should do if they come into contact with someone who may have Covid-19.

We will continue to pass on relevant communications to practices as the official response to Covid-19 develops.
