The professional voice of London general practice

## Seasonal Flu Campaign 2020-2021

In view of the risk of co-circulation of seasonal flu and Covid-19 this winter, the 2020/21 national flu campaign will be essential in protecting our vulnerable patients and reducing clinical workload due to flu.

The following information is intended as a living guide for the seasonal flu vaccination programme for 2020/21, taking into account the additional complexities of delivering a programme during a pandemic and includes national and local changes to the flu programme. It will be updated as required.

Londonwide LMCs Guide: Seasonal Flu Vaccination Programme 2020/21 (version 4.0, published 4.12.2020)

The below links will open the document at the corresponding section if clicked on while using a device which supports opening PDFs in a web browser. For some mobile devices and older computers the document will open, but only on the first page.
