

Coronavirus (Covid-19) official resources and guidance

Government agencies and representative bodies are providing advice on coronavirus via some regularly updated webpages. We suggest you bookmark these pages and check them frequently. All links are best viewed in Chrome.

We have withdrawn and archived our Living Guide and Vaccine Guide documents, including the accompanying microsite. We feel our resources are now better directed to supporting London general practice in other ways, due to the rolling back of a number of Covid provisions and the fact that the remaining measures are now familiar to those working in practices. Our monthly newsletter continues to provide updates on new guidance relating to developing areas such as the Covid-19 Vaccination ES and PCN DES.

Covid-19 vaccination programme

NHS England's information is available here, including the contract documents.

Londonwide LMCs' resources
